SHARP™ Classic Precision Barrier Tips

- Eliminates cross-contamination filter tip
- Sample Low retention
- Certified RNase/DNase, pyrogen free
- Racks are shrink wrapped and sterilized
- Fit Pipetman®, Ultra EZpette, XL3000i and other leading pipettors

SHARP™ Classic precision barrier tips eliminate false signals and cross contamination caused by aerosols. SHARP™ Classic tips feature low retention polymer technology that virtually eliminates sample retention. Our inert hydrophobic barrier prevents pipettor contamination without trapping liquid or contaminating samples. SHARP™ precision barrier tips provide the most accurate sample delivery in the industry. They contain no nucleic acids, PCR inhibitors, detectable nucleases or endotoxins. All sizes are natural color, presterilized and free of metallic content.
